Data source
 Moreland City Council Household 2017, responses to survey question 16, barriers to participation in physical exercise, and question 25 reasons why you do not use recreation and leisure facilities in Moreland. This data excludes respondents that reported they have no barriers. Data has not been weighted for representative age groups and is indicative only at the suburb-level.

Data represents total number of female persons in each age cohort and the language spoken at home.

Data is sorted highest to lowest based on language spoken at home by Masters 35-50 year old age cohort.

Age cohorts have been determined based on age groupings commonly used by sports clubs in Moreland.
